EDUCATION

University Of California, Irvine

Bachelor of Science in Computer Science — Dean's Honor List

June 2026

GPA:3.6

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript/TypeScript, C#, C++, C, Go, SQL, HTML/CSS

Frameworks & Libraries: Typescript, React, Node.js, Next.js, Flask, .NET, Pandas, PyTest

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, Amplify), Azure, Docker, CI/CD, Git, AWS SAM

Databases: PostgreSQL, MySQL, DynamoDB, Aurora, TimescaleDB, Supabase, Prisma ORM, Drizzle ORM

Developer & AI Tools: Claude Code, GitHub Copilot, Cursor, Playwright, Claude (Skills, MCP), OpenAI API

Certifications: AWS Certified Cloud Practitioner(CLF-C02)

EXPERIENCE

CoStar Group | Software Engineering Intern

June 2026 – Present

- Verifying consistent tool-call behavior across **40+** MCP tools, reaching **100%** coverage for the **Homes AI** advisor, by automating **60+** C#/.NET Playwright integration tests on a **CI/CD** pipeline in place of manual QA
- Improving reliability of property tool calls, cutting errors by **30%** across **90K+** monthly requests, by tracing a data initialization failure returning empty results in **Datadog** and revising **system prompts** to update MCP behavior
- Increasing advisor test volume **50%** by designing a **Claude Skill** to automate test creation for V2 of the advisor
- Restoring listing status accuracy across **45,000+** weekly queries by validating sale status during data conversion
- Technologies Used:** C#/.NET, WebSockets, WebRTC, Playwright, MCP, Allure, Datadog, Postman, Azure

University of North Carolina | Software Engineer (Contract, Part-Time)

May 2026 – Present

- Restoring survey sharing on legacy version for **200+** users by tracing auth failures in **CloudWatch** to mismatched SDK versions, then rewriting the publishing logic for Google's Forms API and redeploying via **AWS Amplify**
- Streamlining survey creation for teachers, generating **300+** surveys from **10+** templates using **Go/Google API**
- Equipping teachers to visualize **1,000+** submissions via a **MySQL/RDS** schema powering **Nivo** dashboards
- Technologies Used:** Go, TypeScript, React, Next.js, Prisma, Firebase, AWS Amplify, CloudWatch, Google APIs

University of California, Irvine | Software Engineer (Contract, Part-Time)

May 2026 – Present

- Automating grading assessment of **108,000+** student reflections by building a **FastAPI/OpenAI** scoring API
- Enabling neighboring school districts to purchase **\$5,400+** in credits via a JWT-secured **Stripe** portal
- Technologies Used:** FastAPI, Python, AWS Aurora MySQL, SQLAlchemy, Stripe, Docker, JWT Tokens

WaveAutomate | Software Engineering Intern

January 2026 – April 2026

- Prevented dental practices from missing **30-40%** of inbound calls by building a multilingual **Vapi** workflow supporting **3** languages with a language-detection agent and per-call agent handoff that preserved call context
- Halved operational costs **50%** by migrating account creation and call handling from **Vapi** to **RetellAI**
- Provided **30+** dental offices real-time profit visibility via a **Drizzle ORM/NexHealth API** dashboard
- Technologies Used:** PostgreSQL, Next.js, Drizzle, Google Cloud SQL, Vapi, RetellAI, NexHealth APIs

Design And Partnership | Software Engineering Lead

October 2024 – April 2026

- Delivered instant grading insights on **1,000+** responses, supporting **25+** researchers alongside teacher review
- Gathered **200+** teacher evaluation records by building **Next.js** Server Actions that upload data to **Prisma**
- Reduced grading pipeline costs to zero across **1000+** submissions by migrating from **OpenAI** to **ZotGPT**
- Technologies Used:** Typescript, Next.js Server Actions, Prisma, Vercel, ShadCN, ClerkJS, Radix-Ui, OpenAI

PROJECTS

Zotbins | ASP.NET Core, C#, AWS Lambda, TimescaleDB

September 2024 – April 2026

- Captured peak-hour and high-traffic waste trends across **300+** campus images via a scalable **ASP.NET** backend
- Streamed real-time sensor readings into **TimescaleDB** by programming **5+** serverless **AWS** Lambda functions
- Blocked unauthorized access on **10+** Lambda routes by configuring **CORS** and **API Gateway** rate limits

MindConstellation | FastAPI, Whisper, LLaMA 3.2, Python, Typescript, Supabase

March 2026

- Converted voice reflections into structured emotional insights via an AI-driven journaling platform
- Extracted emotion from voice input in real time by chaining **Whisper** with a **LLaMA 3.2** pipeline
- Synced AI processing with persistent storage by building a **FastAPI** backend integrated with **Supabase**
